Lesson 1: NOUN SUBJECTS

 **POINT 1**

A sentence must always include a subject. The subject is commonly referred to as the "doer" of the sentence. The subject is the word(s) in the sentence that best answers one of these questions: **Whom or what are we talking about?** or **Who or what is doing something?** Always ask these questions to determine the subject of a simple sentence.

Examples:

subject

My **computer** is not working. (**What are we talking about?**)

subject

Mary is singing softly. (**Whom are we talking about?**)

or

(**Who is doing something?**)

Lesson 1: NOUN SUBJECTS

Tutorial Instructions

Now that you have reviewed the Points to Remember for Lesson 1, let's practice identifying one-word nouns and compound-word nouns that function as subjects. As each new sentence appears, read the sentence to determine the one-word noun or compound-word noun that functions as the subject. Once you have identified the subject, do the following: (1) click on the word-function code that identifies the type of subject—select the code **NS** for a one-word noun subject or the code **CNS** for each word of a compound-word noun subject, (2) click on your selected code above the word(s) that you wish to identify as the subject, and (3) click on the Check Answer button. If both your word-function code selection and the word(s) you selected as the subject are correct, the message: **WELL DONE!** Will appear. If either your word-function code selection or word selection is incorrect, this message will appear. **INCORRECT! REMOVE INCORRECT OR MISPLACED CODE(S) WITH A RIGHT CLICK, AND TRY AGAIN.**

Note: For a complete explanation of the Tutorial Exercise procedures, click the Help button; then click Tutorial Exercise Procedures.
